

To whom it may concern,

The Brockstars' project, Think Green: Go Paperless!, has inspired us as a campus to evaluate our own use of paper and to make much needed changes, not only for our budgetary concerns, but for the environment. We were impressed with the research and data our 2nd grade students shared with us. We knew our budget was being affected adversely with the cost of paper each year, but the amount of copies and printings that were being made on campus was eye-opening to say the least. In an effort to continue the "Think Green: Go Paperless" campaign started by the Brockstars in 2nd grade, we are implementing the following policies:

- Limiting each grade level to one printer
 - Limiting the amount of RECYCLED paper each teacher is allotted for each semester
 - Providing training on technology available to the staff
 - Placing as much paperwork online for parents to access
 - Expecting communication to and from home to be online for those with internet access
 - Purchasing 100% recycled paper
- And
- Continuing and rewarding those teachers going paperless through the "Think Green: Go Paperless" movement

We are proud of the effort and awareness shown by our students in Mrs. Brock's class and thank them for helping our campus become more environmentally sensitive and more cost effective. They are truly an example of our motto, "In It Together"! Way to go, Brockstars!

Sincerely,

Mr. Defelice

Principal

Slaughter Elementary
